

The background of the entire image is a silhouette of the Bhangarh Fort in Rajasthan, India, set against a dramatic sunset sky with deep orange and red hues. The fort's walls and towers are dark against the bright sky. A small, arched structure is visible in the foreground, also in silhouette.

RAJASTHAN, INDIA · EST. 1573

BHANGARH FORT

INDIA'S MOST HAUNTED PLACE

Where the government itself warns you not to enter after dark.

CHAPTER I

THE ORIGIN

Built in **1573 AD** by Bhagwant Das, Raja of Amber, the fort was later gifted to his younger son — Madho Singh.

At its peak, over **10,000 people** lived within its walls. It had temples, markets, palaces, and a thriving royal court.

Within one generation, every soul vanished — and never returned.

FOUNDED

1573

ABANDONED

1630s

CHAPTER II

THE SORCERER

SINGHIA — MASTER OF BLACK MAGIC

Singhia was a tantric sorcerer who lived near the fort. Consumed by obsession, he sought to bewitch Princess Ratnavati using an enchanted love potion.

The princess saw through his dark craft. She destroyed the potion — hurling the enchanted oil against a boulder that crushed Singhia alive.

With his dying breath, he cursed the entire fort.

CHAPTER III

PRINCESS RATNAVATI

She was 18 years old — famed throughout Rajputana as an unrivalled beauty. Suitors came from across kingdoms to seek her hand.

The same year Singhia placed his curse, the fort fell to a sudden, devastating battle. Ratnavati perished in the siege.

Legend says her spirit still wanders the ruins, waiting for rebirth.

PRINCESS
OF
BHANGARH

CHAPTER V

THE GOVERNMENT WARNING

The Archaeological Survey of India — a government body — has officially placed signboards at every entrance to Bhangarh Fort.

Entry before sunrise and after sunset is strictly prohibited. No official reason is given beyond general "safety."

OFFICIAL ASI NOTICE

*"STAYING AFTER SUNSET WITHIN
THE BOUNDARY OF BHANGARH IS
STRICTLY PROHIBITED."*

No other fort or historical site in India
carries such a warning from the ASI.
Bhangarh is the sole exception.

CHAPTER VI – WITNESS ACCOUNTS

WHAT VISITORS REPORT

SOUNDS

Inexplicable wailing, laughter, and footsteps heard from within empty chambers.

VISIONS

Shadowy figures moving through the ruins. Lights with no source, flickering in sealed rooms.

DISAPPEARANCES

Multiple groups who entered at night were never found. Police investigations yielded nothing.

CHAPTER VII

THE RUINS TODAY

Bhangarh Fort still stands in the Alwar district of Rajasthan, spread across a vast complex of temples, palaces, markets, and gateways — all crumbling, all empty.

Locals from the surrounding villages refuse to settle within its boundaries — despite it being prime real estate by normal standards.

No roof survives intact. As if something forbids permanence inside these walls.

10,000+

former residents

400+

years abandoned

0

roofs intact

WHY DOES THE GOVERNMENT FEAR A 400-YEAR-OLD RUIN?

OFFICIAL STANCE

The ASI cites "structural danger" and "safety reasons" — standard language used at thousands of other heritage sites where no such ban exists.

WHAT LOCALS SAY

Village elders say the ban was placed after a group of soldiers entered the fort at night for a patrol. None returned by morning.

THE REALITY

No official investigation has ever produced an explanation for the complete abandonment of a thriving 10,000-person city in one generation.

THE FORT STILL STANDS.

THE CURSE HAS NEVER BEEN LIFTED.

Bhangarh Fort receives thousands of visitors every year — all before sunset.

What happens after dark remains, officially, unknown.
